

JITESH K

Bengaluru, Karnataka — 9148337855 — jitesh0510@gmail.com
LinkedIn — GitHub — Portfolio

Professional Summary

AI Engineer with experience developing and deploying production-ready AI applications using Python, FastAPI, PyTorch, LangChain, and Hugging Face. Skilled in Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Computer Vision, and backend AI integration. Experienced in building scalable inference pipelines, optimizing model performance, and delivering end-to-end AI solutions for real-world applications.

Professional Experience

Sentius Technologies

Bengaluru

AI Engineer

Jul 2026 – Present

- Develop and deploy production AI models for intelligent automation and enterprise applications.
- Design scalable inference pipelines to improve latency and real-time prediction performance.
- Integrate LLM-powered services into backend applications using Python, REST APIs, and modern AI frameworks.
- Collaborate with engineering teams to optimize deployment, reliability, and production workflows.

AI Engineer Intern

Jan 2026 – Jun 2026

- Built AI-powered applications using Python, PyTorch, and modern machine learning frameworks.
- Developed and validated inference pipelines for production deployment.
- Integrated AI models into backend services while improving system efficiency and maintainability.

Selected Projects

Report Agent (FinAnalyst) – AI Financial Research System

- Built an automated pipeline that discovered and indexed annual reports for over **2,000 NSE-listed companies** using Serper API with checkpoint-based processing.
- Developed a Retrieval-Augmented Generation (RAG) chatbot using MiniLM embeddings, SQLite vector storage, LangChain, and Groq LLaMA 3.3 70B.
- Implemented document parsing, semantic search, context retrieval, and AI-powered financial question answering.
- **Tech Stack:** Python, FastAPI, LangChain, Groq API, Sentence Transformers, SQLite.

YOLOv8 Computer Vision Applications

- Built object detection pipelines using YOLOv8 and OpenCV for real-time image and video inference.
- Optimized preprocessing and inference workflows for production-ready deployment.
- **Tech Stack:** Python, YOLOv8, OpenCV, PyTorch.

TrackWise – Intelligent Railway Management System

- Developed a full-stack railway management platform supporting train tracking and ticket management.
- Implemented Echo State Networks for train collision prediction and operational analytics.
- **Tech Stack:** Node.js, Express.js, MongoDB, Bootstrap.

Technical Skills

Languages: Python, Java, JavaScript, C++

AI/ML: PyTorch, TensorFlow, Hugging Face Transformers, YOLOv8, OpenCV, NLP, Computer Vision

Generative AI: LLMs, LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, Sentence Transformers, Groq API

Backend: FastAPI, REST APIs

Databases: MySQL, MongoDB, SQLite

Data: Pandas, NumPy, Tableau, Power BI

Tools: Git, GitHub, Docker, Google Cloud

Education

Bachelor of Engineering in Computer Science and Engineering

MVJ College of Engineering, Bengaluru

May 2026

Certifications

AI Agents Bootcamp (LetsUpgrade, 2025) • Generative AI Mastermind (Outskill, 2025)

Google Cloud Skill Badges (2024) • Software Testing – NPTEL (2025)

Leadership

President – Nova Innovative Compskey (NIC)

Led a 30+ member technical club, organized AI workshops, technical events, hackathons, and mentored junior developers.
